

User Acceptance Testing Guide

Role: Regulator (read-only) — demo persona “CDSCO Observer”

Document date: 12 September 2026

Application under test: **<https://ayusphere-three.vercel.app>**

Environment: Production demo (seeded demo data — no real patient data)

This guide walks you, step by step, through every feature available to the **Regulator (read-only)** role. No technical knowledge is required — follow the numbered steps, compare what you see with the screenshot, tick the checklist, and record Pass / Fail in the sign-off table at the end. All screenshots were captured from the live application.

AYUSH — Traditional Wisdom, Modern Evidence

About this role

What the Regulator can do: observe. This is a strictly read-only oversight role for the regulatory authority: the live portfolio dashboard, the complete immutable audit trail, and messaging (communication only — messaging never mutates a clinical record).

What the Regulator cannot do — by design: anything that changes clinical data. The RBAC matrix guarantees the regulator holds not a single mutating capability: no trial, participant, CRF, adverse-event, monitoring, alert-acknowledgement, document, export, or settings action exists for this role. The central UAT question for this guide is therefore: *can you see everything you should, and change nothing?*

What you will test

1. Logging in
2. Navigation overview & dashboard (read-only)
3. Audit Trail — regulatory inspection
4. Messages (internal communication)
5. Signing out

Before you start

General notes for testers:

- Use a modern desktop browser (Chrome or Edge recommended) at a comfortable window size.
- This is a shared demo environment — other testers may add data while you test; counts in your screenshots may differ slightly from the figures in this guide. That is normal and not a defect.
- Every action you take is recorded in the immutable audit trail — this is by design (ALCOA+ compliance).
- AI features (Doctor Note extraction and the AI Copilot) are powered by a configurable AI provider — currently Google Gemini (gemini-2.5-flash); an administrator can switch to Anthropic Claude under Settings. AI output can vary between runs; judge behaviour, not exact wording.
- If a page fails to load, refresh once before recording a failure (cold serverless starts can take a few seconds).

1 Logging in

What this is for. AyuSphere is protected by role-based access control (RBAC). Signing in with your role account determines exactly which pages and actions you can see — nothing more, nothing less.

STEPS

1. Open a browser and go to `https://ayusphere-three.vercel.app`. You are redirected to the login page.
2. In the **Email** field type `regulator@aiaa.demo`.
3. In the **Password** field type `Demo@1234`.
4. Click the **Sign in** button.

Expected result. You are taken to the **Dashboard**. The top-right corner shows “CDSCO Observer — Regulator”.

ACCEPTANCE CHECKLIST

- ☐ The login page loads with AyuSphere branding.
- ☐ A wrong password shows an error and does NOT log you in (try once, then use the correct one).
- ☐ The correct credentials open the dashboard.
- ☐ Your name and role are shown in the top-right corner.

2 Navigation overview & dashboard (read-only)

What this is for. Live, unfiltered visibility of the portfolio the authority oversees: trial KPIs, participant distribution, site recruitment, visit compliance and AI-surfaced signals — with no action buttons anywhere.

STEPS

1. After logging in, check the left sidebar. As Regulator you should see exactly three items: **Dashboard, Messages, Audit Trail**.
2. Confirm none of the operational pages exist for you (no Clinical Trials, Participants, Data Entry, Adverse Events, Alerts, Exports or Settings entries).
3. Review the dashboard: KPI tiles, trial progress, participant distribution, site performance, upcoming visits and AI insights.
4. Try navigating directly to an operational URL, e.g. `https://ayusphere-three.vercel.app/trials` — access must be refused or redirected, not rendered.

Expected result. Full read visibility of portfolio metrics; a sidebar of exactly three items; direct URLs to operational pages are blocked by the RBAC layer.

ACCEPTANCE CHECKLIST

- ☐ The sidebar shows exactly the menu items listed above — no more, no fewer.
- ☐ The welcome header greets you by name.
- ☐ KPI tiles show numbers (not errors or blank tiles).
- ☐ The current date is displayed correctly.
- ☐ Direct navigation to /trials (or any operational page) is refused.

3 Audit Trail — regulatory inspection

What this is for. The heart of regulatory oversight: the immutable (insert-only, ALCOA+) record of every action ever taken on the platform — who did what, when, to which entity, with before/after values. Nothing can be edited or deleted, by anyone.

STEPS

1. Click **Audit Trail** in the sidebar.
2. Scan rows: timestamp, actor role (pi / coordinator / admin / ethics / pv ...), action (trial.transition, crf.submit, extraction.approve, ae capture/review, message.send, export.fhir, settings.ai_update, ...), entity, and the change payload.
3. Use the **Entity type / Entity ID / Action** filters to reconstruct one story — e.g. filter action `trial.transition` to follow a trial from draft through IEC approval to activation.
4. Confirm the page offers no edit, delete or export-tampering control of any kind.

Expected result. The full cross-role activity record is readable and filterable; the trail is visibly append-only with before/after payloads; no mutation controls exist.

ACCEPTANCE CHECKLIST

- ☐ Rows show timestamp, actor role, action, entity and before/after change.
- ☐ Filters narrow the trail correctly.
- ☐ Actions from all roles are visible (pi, coordinator, admin, ethics...).
- ☐ No edit or delete control exists anywhere.

AyuSphere UAT Guide — confidential demo environment

Page 7 of 11

4 Messages (internal communication)

What this is for. Direct one-to-one messaging with every other user on the platform — coordinators, investigators, monitors, ethics, pharmacovigilance, admin and the regulator — so trial communication stays inside the audited system. For the Regulator this is the one permitted interaction — communication only; it creates no clinical record.

STEPS

1. Click **Messages** in the left sidebar.
2. The **People** list on the left shows every other platform user with their role badge.
3. Click a person (for example the Study Coordinator) to open the conversation panel.
4. Type a short test message (e.g. "UAT test — please ignore") and send it.
5. Confirm your message appears in the thread with a timestamp.

Expected result. The people list shows the other demo users with role badges. A sent message appears immediately in the conversation and is delivered to the recipient (message events are also recorded in the audit trail).

ACCEPTANCE CHECKLIST

- ☐ Messages page opens from the sidebar.
- ☐ All other demo users are listed with correct role badges.
- ☐ Selecting a person opens a chat panel.
- ☐ A test message can be sent and appears with a timestamp.

Fig. 4. Messages — people list and conversation panel. Captured from the live system on 12 September 2026.

5 Signing out

What this is for. Ends your session so nobody else can act under your account — important on shared computers at trial sites.

STEPS

1. Click your **name / avatar** in the top-right corner of any page.
2. Choose **Sign out** from the menu.

Expected result. You are returned to the login page. Pressing the browser Back button does not re-open protected pages with your data.

ACCEPTANCE CHECKLIST

- ☐ The sign-out option is available from the top-right user menu.
- ☐ After signing out you land on the login page.
- ☐ Navigating directly to a protected page (e.g. /dashboard) redirects you to log in again.

UAT sign-off

Record the outcome of each test case. A test passes when every item of its acceptance checklist is satisfied.

ID	Step / feature	Expected	Pass / Fail	Remarks
TC-01	Logging in	Login succeeds; dashboard opens with correct name and role		
TC-02	Navigation overview & dashboard (read-only)	Dashboard visible read-only; sidebar limited to 3 items; direct URLs blocked		
TC-03	Audit Trail — regulatory inspection	Complete immutable audit trail readable and filterable		
TC-04	Messages (internal communication)	People list shows all users; a test message sends and appears in the thread		
TC-05	Signing out	Session ends; protected pages no longer accessible
