This guide walks you, step by step, through every feature available to the **Ethics Committee (IEC)** role. No technical knowledge is required — follow the numbered steps, compare what you see with the screenshot, tick the checklist, and record Pass / Fail in the sign-off table at the end. All screenshots were captured from the live application.

AYUSH — Traditional Wisdom, Modern Evidence

About this role

What the Ethics Committee can do: the IEC decision gate — review trials submitted for ethics review and either approve them or return them to draft. IEC approval is a hard gate in the trial lifecycle: no trial reaches CTRI registration or activation without it. Ethics also sees the shared dashboard and can message any user.

What the Ethics Committee cannot do: anything else that mutates trial data — no trial editing, participant management, CRF entry or approval, adverse-event handling, exports, documents, monitoring, audit or settings. Only Ethics and the Administrator hold the IEC approval capability.

What you will test

1. Logging in
2. Navigation overview & dashboard
3. Ethics Review — the IEC queue
4. Messages (internal communication)
5. Signing out

Before you start

General notes for testers:

- Use a modern desktop browser (Chrome or Edge recommended) at a comfortable window size.
- This is a shared demo environment — other testers may add data while you test; counts in your screenshots may differ slightly from the figures in this guide. That is normal and not a defect.
- Every action you take is recorded in the immutable audit trail — this is by design (ALCOA+ compliance).
- AI features (Doctor Note extraction and the AI Copilot) are powered by a configurable AI provider — currently Google Gemini (gemini-2.5-flash); an administrator can switch to Anthropic Claude under Settings. AI output can vary between runs; judge behaviour, not exact wording.
- If a page fails to load, refresh once before recording a failure (cold serverless starts can take a few seconds).

1 Logging in

What this is for. AyuSphere is protected by role-based access control (RBAC). Signing in with your role account determines exactly which pages and actions you can see — nothing more, nothing less.

STEPS

1. Open a browser and go to `https://ayusphere-three.vercel.app`. You are redirected to the login page.
2. In the **Email** field type `ethics@aiia.demo`.
3. In the **Password** field type `Demo@1234`.
4. Click the **Sign in** button.

Expected result. You are taken to the **Dashboard**. The top-right corner shows “Prof. S. Iyer — Ethics Committee”.

ACCEPTANCE CHECKLIST

- ☐ The login page loads with AyuSphere branding.
- ☐ A wrong password shows an error and does NOT log you in (try once, then use the correct one).
- ☐ The correct credentials open the dashboard.
- ☐ Your name and role are shown in the top-right corner.

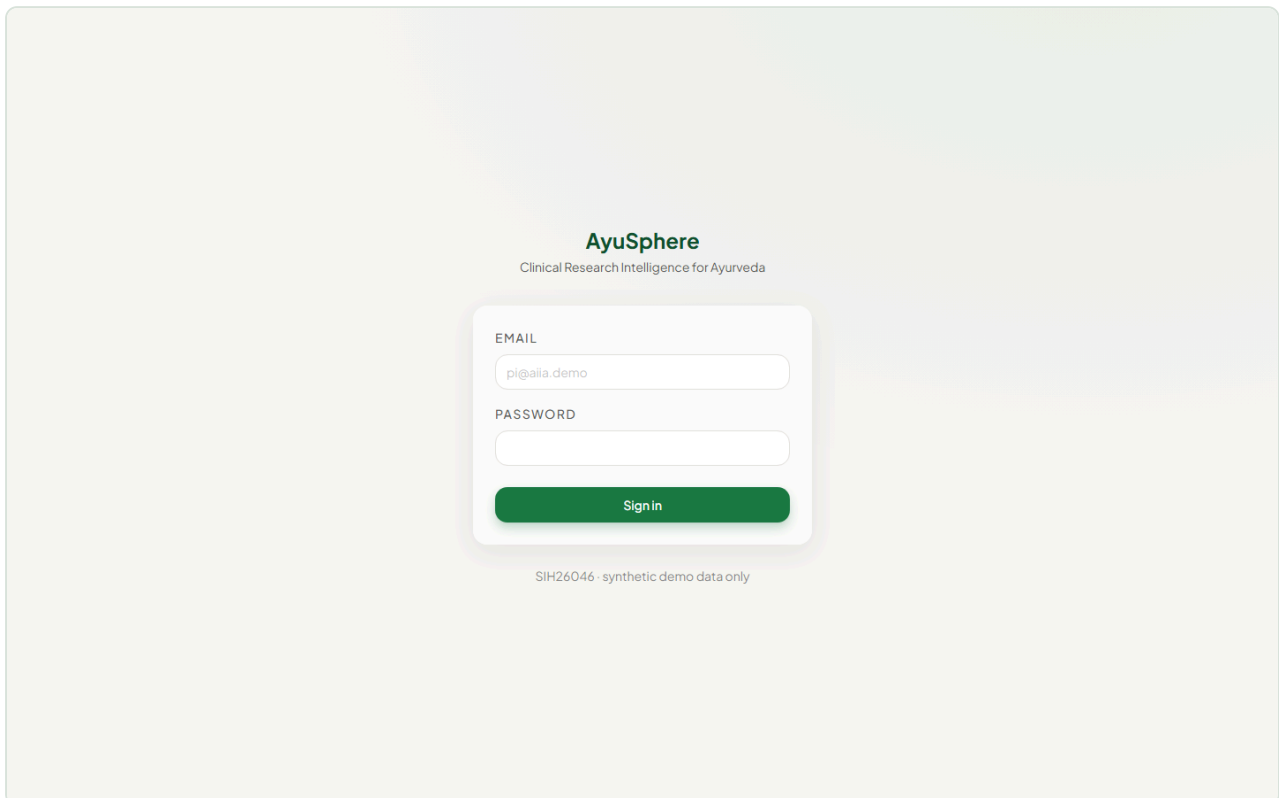

Fig. 1. The AyuSphere login page. Captured from the live system on 12 September 2026.

2 Navigation overview & dashboard

What this is for. Portfolio context before a review: trial KPIs, participant distribution, site activity and safety signals.

STEPS

1. After logging in, check the left sidebar. As Ethics you should see exactly three items: **Dashboard**, **Messages**, **Ethics Review**.
2. Confirm no other menu entries appear (no trials list, participants, data entry, audit or settings).
3. Review the dashboard widgets for overall portfolio health.

Expected result. The dashboard renders and the sidebar is limited to Dashboard, Messages and Ethics Review.

ACCEPTANCE CHECKLIST

- ☐ The sidebar shows exactly the menu items listed above — no more, no fewer.
- ☐ The welcome header greets you by name.
- ☐ KPI tiles show numbers (not errors or blank tiles).
- ☐ The current date is displayed correctly.

3 Ethics Review — the IEC queue

What this is for. The Institutional Ethics Committee queue. Trials submitted by the PI for IEC review wait under “Awaiting decision” with Approve / Return actions; the “Approved registry” below is the permanent record of every trial that has passed the gate, with its current lifecycle status.

STEPS

1. Click **Ethics Review** in the sidebar.
2. Check **Awaiting decision**: any trial currently in *iec_review* appears here with its protocol details and two actions — **Approve** and **Return**. (If the queue shows zero, ask the PI tester to submit a draft trial for IEC review, then refresh.)
3. To test the gate: approve a submitted trial and confirm its status becomes *iec approved*; or return one and confirm it goes back to *draft* for rework.
4. Review the **Approved registry**: every past approval with CTRI ID, full title and current status chip (*iec approved* / *ctri registered* / *active*).

Expected result. Trials in *iec_review* appear in the queue with Approve/Return; a decision moves the trial's lifecycle immediately and is audit-logged; the registry lists all previously approved trials.

ACCEPTANCE CHECKLIST

- ☐ The Awaiting decision queue renders (with a clear empty state when zero).
- ☐ The Approved registry lists trials with current status chips.
- ☐ Approve moves a trial to *iec approved* (when tested with the PI).
- ☐ Return sends a trial back to *draft* (when tested with the PI).

4 Messages (internal communication)

What this is for. Direct one-to-one messaging with every other user on the platform — coordinators, investigators, monitors, ethics, pharmacovigilance, admin and the regulator — so trial communication stays inside the audited system. Use it to request protocol clarifications from the PI before a decision.

STEPS

1. Click **Messages** in the left sidebar.
2. The **People** list on the left shows every other platform user with their role badge.
3. Click a person (for example the Study Coordinator) to open the conversation panel.
4. Type a short test message (e.g. “UAT test — please ignore”) and send it.
5. Confirm your message appears in the thread with a timestamp.

Expected result. The people list shows the other demo users with role badges. A sent message appears immediately in the conversation and is delivered to the recipient (message events are also recorded in the audit trail).

ACCEPTANCE CHECKLIST

- ☐ Messages page opens from the sidebar.
- ☐ All other demo users are listed with correct role badges.
- ☐ Selecting a person opens a chat panel.
- ☐ A test message can be sent and appears with a timestamp.

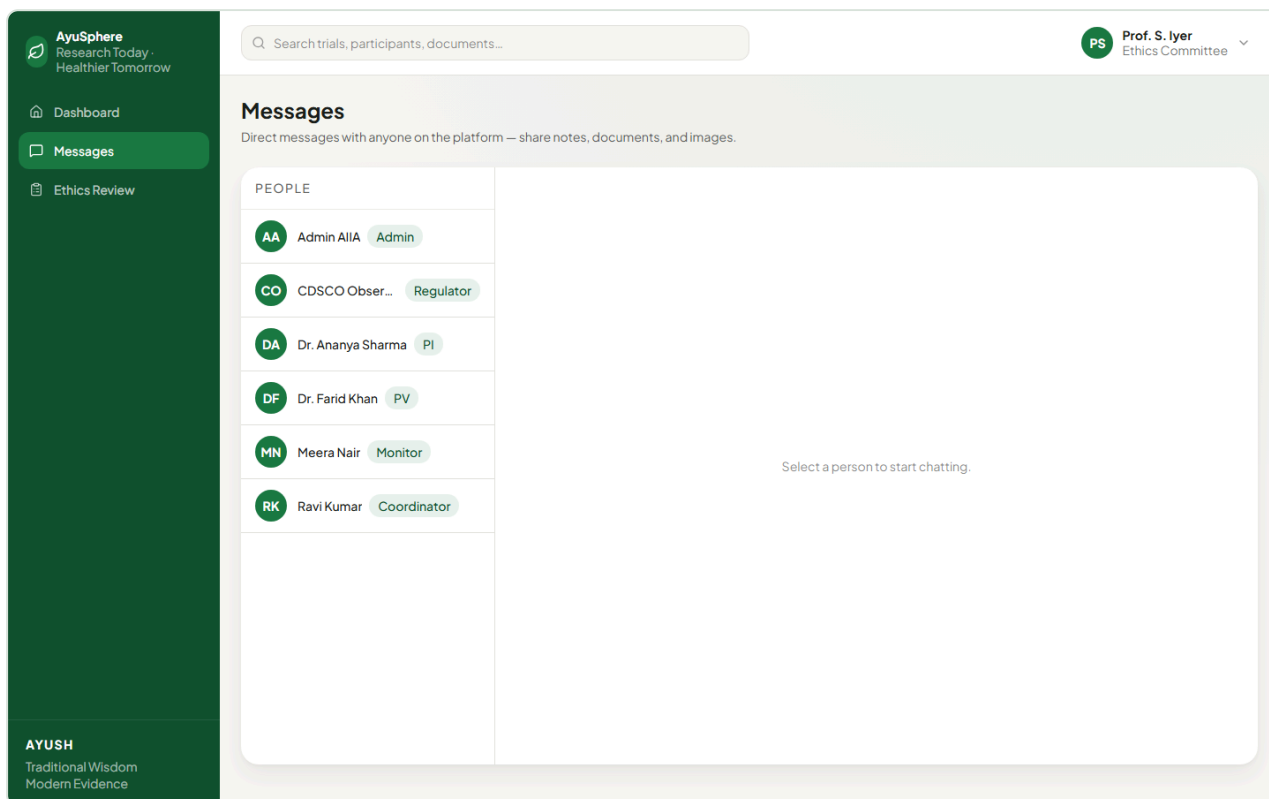

Fig. 4. Messages — people list and conversation panel. Captured from the live system on 12 September 2026.

5 Signing out

What this is for. Ends your session so nobody else can act under your account — important on shared computers at trial sites.

STEPS

1. Click your **name / avatar** in the top-right corner of any page.
2. Choose **Sign out** from the menu.

Expected result. You are returned to the login page. Pressing the browser Back button does not re-open protected pages with your data.

ACCEPTANCE CHECKLIST

- ☐ The sign-out option is available from the top-right user menu.
- ☐ After signing out you land on the login page.
- ☐ Navigating directly to a protected page (e.g. /dashboard) redirects you to log in again.

UAT sign-off

Record the outcome of each test case. A test passes when every item of its acceptance checklist is satisfied.

ID	Step / feature	Expected	Pass / Fail	Remarks
TC-01	Logging in	Login succeeds; dashboard opens with correct name and role		
TC-02	Navigation overview & dashboard	Dashboard renders; sidebar limited to 3 items		
TC-03	Ethics Review — the IEC queue	IEC queue shows awaiting trials; Approve/Return moves lifecycle; registry lists approvals		
TC-04	Messages (internal communication)	People list shows all users; a test message sends and appears in the thread		
TC-05	Signing out	Session ends; protected pages no longer accessible
