

User Acceptance Testing Guide

Role: Monitor (CRA) — demo persona “Meera Nair”

Document date: 12 September 2026

Application under test: **<https://ayusphere-three.vercel.app>**

Environment: Production demo (seeded demo data — no real patient data)

This guide walks you, step by step, through every feature available to the **Monitor (CRA)** role. No technical knowledge is required — follow the numbered steps, compare what you see with the screenshot, tick the checklist, and record Pass / Fail in the sign-off table at the end. All screenshots were captured from the live application.

AYUSH — Traditional Wisdom, Modern Evidence

About this role

What the Monitor can do: independent oversight of trial conduct — the Monitoring workspace (site performance, protocol deviations and data-quality findings across active trials), acknowledging alerts, the shared dashboard, and messaging the team.

What the Monitor cannot do: enter or approve CRF data, manage trials or participants, capture or review adverse events, run exports, upload documents, or administer users — monitoring is deliberately separated from data production.

What you will test

1. Logging in
2. Navigation overview & dashboard
3. Monitoring workspace
4. Alerts — acknowledge
5. Messages (internal communication)
6. Signing out

Before you start

General notes for testers:

- Use a modern desktop browser (Chrome or Edge recommended) at a comfortable window size.
- This is a shared demo environment — other testers may add data while you test; counts in your screenshots may differ slightly from the figures in this guide. That is normal and not a defect.
- Every action you take is recorded in the immutable audit trail — this is by design (ALCOA+ compliance).
- AI features (Doctor Note extraction and the AI Copilot) are powered by a configurable AI provider — currently Google Gemini (gemini-2.5-flash); an administrator can switch to Anthropic Claude under Settings. AI output can vary between runs; judge behaviour, not exact wording.
- If a page fails to load, refresh once before recording a failure (cold serverless starts can take a few seconds).

1 Logging in

What this is for. AyuSphere is protected by role-based access control (RBAC). Signing in with your role account determines exactly which pages and actions you can see — nothing more, nothing less.

STEPS

1. Open a browser and go to `https://ayusphere-three.vercel.app`. You are redirected to the login page.
2. In the **Email** field type `monitor@aiaa.demo`.
3. In the **Password** field type `Demo@1234`.
4. Click the **Sign in** button.

Expected result. You are taken to the **Dashboard**. The top-right corner shows “Meera Nair — Monitor”.

ACCEPTANCE CHECKLIST

- ☐ The login page loads with AyuSphere branding.
- ☐ A wrong password shows an error and does NOT log you in (try once, then use the correct one).
- ☐ The correct credentials open the dashboard.
- ☐ Your name and role are shown in the top-right corner.

Fig. 1. The AyuSphere login page. Captured from the live system on 12 September 2026.

2 Navigation overview & dashboard

What this is for. A compact read of the portfolio you oversee: KPIs, trial progress, site recruitment, visits and AI insights.

STEPS

1. After logging in, check the left sidebar. As Monitor you should see exactly four items: **Dashboard, Messages, Monitoring, Alerts**.
2. Confirm no data-entry, trial-management, export, audit or settings entries appear.
3. Review the dashboard widgets (KPIs, charts, upcoming visits, AI insights).

Expected result. The dashboard renders and the sidebar is limited to the Monitor's four items.

ACCEPTANCE CHECKLIST

- ☐ The sidebar shows exactly the menu items listed above — no more, no fewer.
- ☐ The welcome header greets you by name.
- ☐ KPI tiles show numbers (not errors or blank tiles).
- ☐ The current date is displayed correctly.

Fig. 2. Monitor dashboard. Captured from the live system on 12 September 2026.

3 Monitoring workspace

What this is for. The Monitor's home: every active trial with its site, enrolment progress, and automatically detected data-quality findings (e.g. visits completed without an approved CRF entry, duplicate entries) plus open deviation and visit alerts — the raw material of a monitoring visit report.

STEPS

1. Click **Monitoring** in the sidebar.
2. For each trial block, read: CTRI ID and title, site name, enrolment progress bar, and the **Data-quality findings** list.
3. Check finding types: *missing required assessment* (a visit completed without an approved CRF entry) and *duplicate entry* (multiple approved CRF entries for one visit).
4. Trials with clean data show "No open data-quality findings".
5. Scroll to **Open deviation & visit alerts** at the bottom: visit-overdue, protocol-deviation and data-quality alerts across the portfolio.

Expected result. Every active trial is listed with enrolment and findings; findings name the exact visit and problem; the deviation/alert roll-up shows the open issues across trials.

ACCEPTANCE CHECKLIST

- ☐ Each trial shows site, enrolment progress and findings (or a clean bill).
- ☐ Findings name the specific visit and issue type.
- ☐ The open deviation & visit alerts roll-up renders at the bottom.

4 Alerts — acknowledge

What this is for. The same alert stream the sites see — protocol deviations, overdue visits, data-quality and enrolment-lag warnings. Acknowledging documents monitoring awareness of each issue.

STEPS

1. Click **Alerts** in the sidebar.
2. Review severities (danger / warning), categories and timestamps.
3. Acknowledge one alert and confirm it leaves the open list.

Expected result. Alerts render with severity and category; acknowledgement clears the alert and is recorded in the audit trail.

ACCEPTANCE CHECKLIST

- ☐ Alerts show severity, category and time.
- ☐ Acknowledge removes the alert from the open list.

5 Messages (internal communication)

What this is for. Direct one-to-one messaging with every other user on the platform — coordinators, investigators, monitors, ethics, pharmacovigilance, admin and the regulator — so trial communication stays inside the audited system. As Monitor you use it to raise findings with the PI or Coordinator without leaving the audited platform.

STEPS

1. Click **Messages** in the left sidebar.
2. The **People** list on the left shows every other platform user with their role badge.
3. Click a person (for example the Study Coordinator) to open the conversation panel.
4. Type a short test message (e.g. "UAT test — please ignore") and send it.
5. Confirm your message appears in the thread with a timestamp.

Expected result. The people list shows the other demo users with role badges. A sent message appears immediately in the conversation and is delivered to the recipient (message events are also recorded in the audit trail).

ACCEPTANCE CHECKLIST

- ☐ Messages page opens from the sidebar.
- ☐ All other demo users are listed with correct role badges.
- ☐ Selecting a person opens a chat panel.
- ☐ A test message can be sent and appears with a timestamp.

Fig. 5. Messages — people list and conversation panel. Captured from the live system on 12 September 2026.

6 Signing out

What this is for. Ends your session so nobody else can act under your account — important on shared computers at trial sites.

STEPS

1. Click your **name / avatar** in the top-right corner of any page.
2. Choose **Sign out** from the menu.

Expected result. You are returned to the login page. Pressing the browser Back button does not re-open protected pages with your data.

ACCEPTANCE CHECKLIST

- ☐ The sign-out option is available from the top-right user menu.
- ☐ After signing out you land on the login page.
- ☐ Navigating directly to a protected page (e.g. /dashboard) redirects you to log in again.

UAT sign-off

Record the outcome of each test case. A test passes when every item of its acceptance checklist is satisfied.

ID	Step / feature	Expected	Pass / Fail	Remarks
TC-01	Logging in	Login succeeds; dashboard opens with correct name and role		
TC-02	Navigation overview & dashboard	Dashboard renders; sidebar shows only 4 Monitor items		
TC-03	Monitoring workspace	Monitoring lists per-trial data-quality findings and open deviations		
TC-04	Alerts — acknowledge	Alerts visible; acknowledge clears and records		
TC-05	Messages (internal communication)	People list shows all users; a test message sends and appears in the thread		
TC-06	Signing out	Session ends; protected pages no longer accessible
