Generated 14 September 2026 from the application's living knowledge base — click paths in this guide are the exact labels in the product and are drift-guard tested against the navigation and permission matrix.

1 · Your workspace

The dark green sidebar on the left lists every screen your role can access, grouped into sections (Overview, Study Conduct, Data Capture, Safety & Quality, Intelligence, System) when the list is long. On phones, the sidebar becomes a menu button (☰) in the top bar that opens the same navigation as a drawer. The top bar also has a quick search (type 2+ letters to jump to a screen, a trial by protocol code, or a participant by subject code — Enter opens the first match), a bell icon showing open alerts (click it to open **Alerts** if your role has it), and your profile chip.

Dashboard · Messages · Ethics Review

The screenshot shows the AyuSphere dashboard interface. On the left is a dark green sidebar with the AyuSphere logo and navigation links: Dashboard (selected), Messages, and Ethics Review. The top bar includes a search field, a profile chip for Prof. S. Iyer (Ethics Committee), and the date/time: Sunday, 13 Sept 2026, 12:31 am. The main content area is titled 'Welcome, Prof. S. Iyer' and describes the platform as an AI-powered tool for Ayurveda clinical trials. It features two summary cards: 'Awaiting IEC review (0)' with a 'Review queue' link, and 'Amendment queue (0)' with a 'Decide' link. Below these is a 'Recent Activities' list showing four events, each with an AyuSphere icon, a description, and a timestamp of '2 hrs ago'. At the bottom, a banner reads 'Bridging Ancient Wisdom with Modern Science' with subtext 'Evidence | Safety | Better Lives' and three icons labeled 'AI-Powered', 'Standardized', and 'Compliant'. A floating green button with a speech bubble icon is in the bottom right corner.

Dashboard

2 · What you can and cannot do

You can

- approve or return trials submitted for IEC review
- approve or return protocol amendments (the gate for changing a running trial's protocol)
- message any user

You cannot

- create or edit trials, participants or CRFs — you decide on submissions, you don't run studies
- see exports, alerts, or the AI Copilot
- delete or edit audit-trail entries — the audit log is append-only for everyone, including admins

3 · Core workflows (exact click paths)

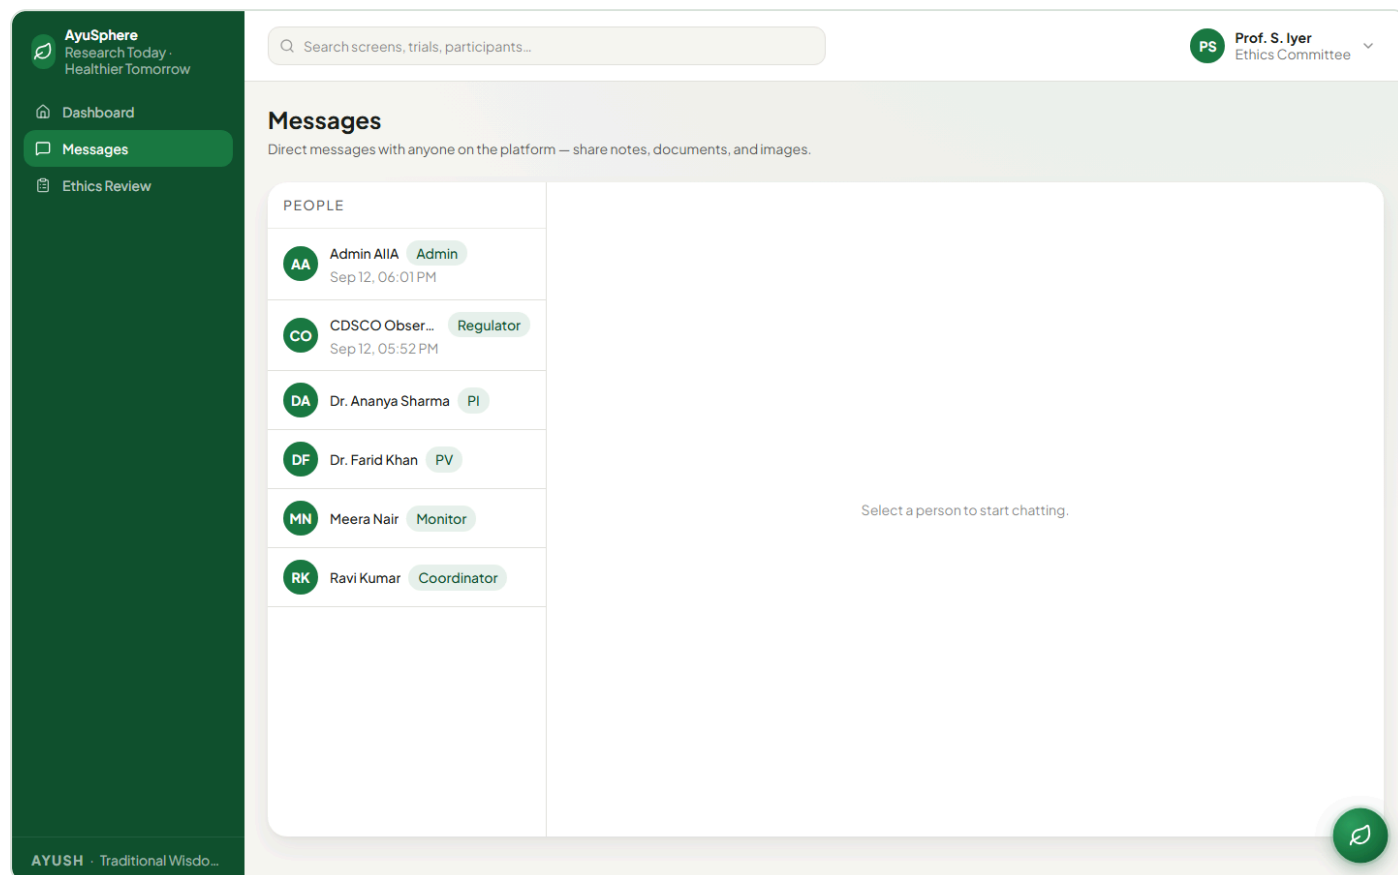

Decide on a submitted trial

1. Go to **Ethics Review** — 'Awaiting decision' lists trials in IEC review with their protocol document named
2. Click **Approve** to grant IEC approval (unblocks CTIRI registration) or **Return** to send it back to draft
3. The 'Approved registry' below lists everything you've approved and its current status

Decide on a protocol amendment

1. On **Ethics Review**, the 'Amendment queue' lists protocol amendments submitted by investigators (version, summary, trial)
2. Click **Approve**, or type a comment and click **Return** (a return REQUIRES a comment) — protocol changes on running trials are blocked until an amendment is approved

Ethics Review

5 • New in this build

- **Amendment queue** — protocol amendments now come to you; returning one requires a comment, and running-trial changes stay blocked until approval
- **Tailored dashboard** — the IEC review queue and amendment queue are the whole page
- **Sphera guide with memory**, quick-search, mobile drawer

How this role scores in evaluation: Axis 4 (access control): the IEC gate — nothing reaches CTRI/activation without your decision; amendments gate running-trial changes.

AyuSphere · SIH26046 · Ethics Committee UAT guide · generated 14 September 2026 · all participant data synthetic (DPDP), trials are public CTRI registry records.
