

AyuSphere · UAT Guide

Regulator

AyuSphere — AI-assisted Clinical Research Intelligence Platform for Ayurveda (SIH26046). All participant data is synthetic/de-identified; trials are real public CTRI registry records.

Problem statement **SIH26046** · Ministry of Ayush · All India Institute of Ayurveda

Generated 14 September 2026 from the application's living knowledge base — click paths in this guide are the exact labels in the product and are drift-guard tested against the navigation and permission matrix.

1 · Your workspace

The dark green sidebar on the left lists every screen your role can access, grouped into sections (Overview, Study Conduct, Data Capture, Safety & Quality, Intelligence, System) when the list is long. On phones, the sidebar becomes a menu button (☰) in the top bar that opens the same navigation as a drawer. The top bar also has a quick search (type 2+ letters to jump to a screen, a trial by protocol code, or a participant by subject code — Enter opens the first match), a bell icon showing open alerts (click it to open **Alerts** if your role has it), and your profile chip.

Dashboard

2 · What you can and cannot do

You can

- read-only dashboard and complete audit trail
- message any user

You cannot

- change ANYTHING — no trials, participants, CRFs, approvals, exports or settings; every mutating page redirects you away
- delete or edit audit-trail entries — the audit log is append-only for everyone, including admins

3 · Core workflows (exact click paths)

Inspect the portfolio read-only

1. **Dashboard** shows live portfolio KPIs; you can view but never change anything

Walk the audit trail

1. Go to **Audit Trail**, filter by entityType/entityId/action and click **Filter** — the complete, immutable history of every action, including who approved each record and when
2. Approvals and safety reports carry an electronic signature: the audit snapshot shows the signature id and the SHA-256 hash of the signed record

Audit Trail

5 · New in this build

- **Signature evidence** — audit rows for approvals/reports include the e-signature id and the SHA-256 hash of the signed record
- **DSMB safety summary** — read-only access to the aggregate safety view
- **Tailored read-only dashboard** with portfolio charts and safety signals
- **Sphera guide with memory**, quick-search, mobile drawer

How this role scores in evaluation: Axis 4 (access-control & audit completeness): strictly read-only everywhere + the complete immutable audit trail.
