

AyuSphere · UAT Guide

Study Coordinator

AyuSphere — AI-assisted Clinical Research Intelligence Platform for Ayurveda (SIH26046). All participant data is synthetic/de-identified; trials are real public CTRI registry records.

Problem statement **SIH26046** · Ministry of Ayush · All India Institute of Ayurveda

Live demo: <https://ayusphere-three.vercel.app>

Sign in as: [coordinator@aiaa.demo](#) · password [Demo@1234](#)

Generated 14 September 2026 from the application's living knowledge base — click paths in this guide are the exact labels in the product and are drift-guard tested against the navigation and permission matrix.

1 · Your workspace

The dark green sidebar on the left lists every screen your role can access, grouped into sections (Overview, Study Conduct, Data Capture, Safety & Quality, Intelligence, System) when the list is long. On phones, the sidebar becomes a menu button (☰) in the top bar that opens the same navigation as a drawer. The top bar also has a quick search (type 2+ letters to jump to a screen, a trial by protocol code, or a participant by subject code — Enter opens the first match), a bell icon showing open alerts (click it to open **Alerts** if your role has it), and your profile chip.

Drag & drop lab report / prescription or click to upload
Supports: JPG, PNG (max 10 MB)

Dashboard

2 · What you can and cannot do

You can

- manage participants (screening, consent, enrolment, withdrawal)
- enter CRF drafts and submit them, scan doctor notes, capture adverse events
- create/edit trials, upload documents, use the AI Copilot

You cannot

- APPROVE CRF entries or note extractions — only the PI or Admin can
- approve ethics reviews (Ethics Committee/Admin) or run the PV review walk (Pharmacovigilance/Admin)
- manage sites' registry, users, exports or settings
- delete or edit audit-trail entries — the audit log is append-only for everyone, including admins

3 · Core workflows (exact click paths)

Add and enrol a participant

1. Go to **Participants**, choose the active trial · site, click **Add (code auto-generated)**
2. Click **Pass screening**, then **Record consent** (binds the trial's current consent-form version), then **Enrol & randomize** — the arm is assigned automatically and visits are generated

Answer a monitor's data query

1. Open the visit under **Visit Schedule** — an entry with an open query shows the monitor's question; type the answer and click **Answer** (approval stays blocked until answered)

Enter visit data (e-CRF)

1. Go to **Visit Schedule**, open the due visit, fill the fields and click **Save & submit for approval**
2. The PI (or Admin) approves it — you'll see the entry marked approved afterwards

Scan a doctor note (AI OCR)

1. **Data Entry (eCRF)** → choose the visit → **Note photo** → **Extract to CRF draft**
2. Review the extracted fields; the draft is saved for the PI to approve

Track milestones and upload documents

1. Trial pages show IEC/CTRI milestone status; upload consent forms and protocol versions under **Documents** (pick trial, kind, file ≤ 2 MB, click **Upload**)

NARRATIVE

short clinical narrative

Capture — starts the escalation clock

Adverse Events — Capture tab (MedDRA/WHODrug pickers)

5 · New in this build

- **Enrol & randomize** — arm assignment is automatic (permuted-block); consent binds the current consent-form version
- **Data queries** — answer the monitor's question on the visit page; approval stays blocked until answered
- **AE Capture tab** — MedDRA/WHODrug dictionary pickers code the event as you type
- **Tailored dashboard** — today's visits and open queries lead the page
- **Sphera guide with memory**, grouped sidebar, quick-search, mobile drawer, live badges

How this role scores in evaluation: Axis 1 (data accuracy & integrity): validated capture, query answers, consent versioning.

AyuSphere · SIH26046 · Study Coordinator UAT guide · generated 14 September 2026 · all participant data synthetic (DPDP), trials are public CTRI registry records.
